

Write the code. Change the world.

SWIFT GIRLS (IOS) PART2

SWIFT GIRLS (IOS)

專為Swift新手展開的第一次"探勘"行動

Swift Girls aims to give tools for girls and women to build their ideas.

希望不斷推廣而有更多女生一同透過交流學習,一起了解ios開發並能互相切磋,歡迎對Swift語言有興趣的一起加入!

雅方比女人更了解女人的雅方

也是雅方冰淇淋的雅方

雅方羊肉爐的雅方

SWIFT GIRLS (IOS)-PART2

發問解答工具

- 1. Github(程式碼儲存庫), stackOverFlow
- 2. google 大神
- 3. 社群發問

這次範例Github:

https://github.com/Avonee/swift-girls-meetig_teachin

SWIFT GIRLS (IOS)-PART2

A. Review

重新複習工具介面 & 功能語法

B. 免費開發者

放在自己的手機裡執行,實機GO!!!

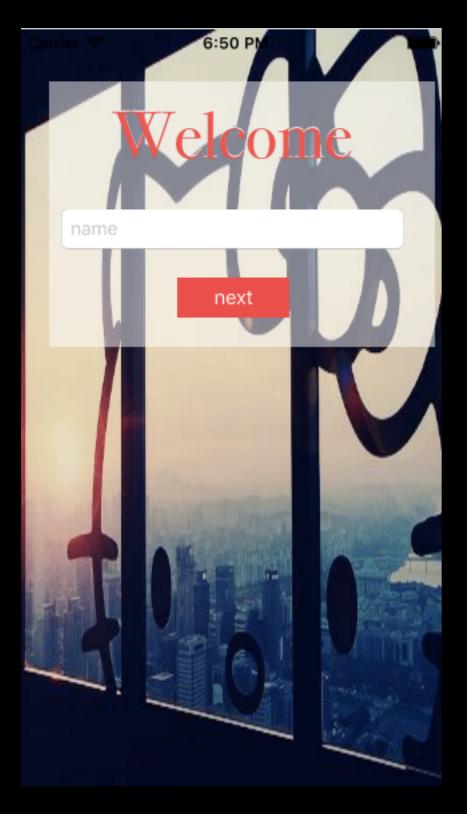

下次預告:D

Continue Page 3 Web View & 簡單的Git

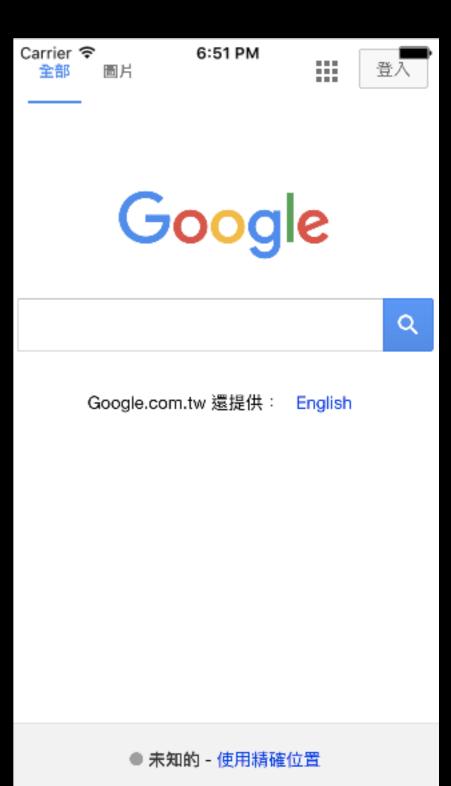

Write the code. Change the world.

REVIEW ...

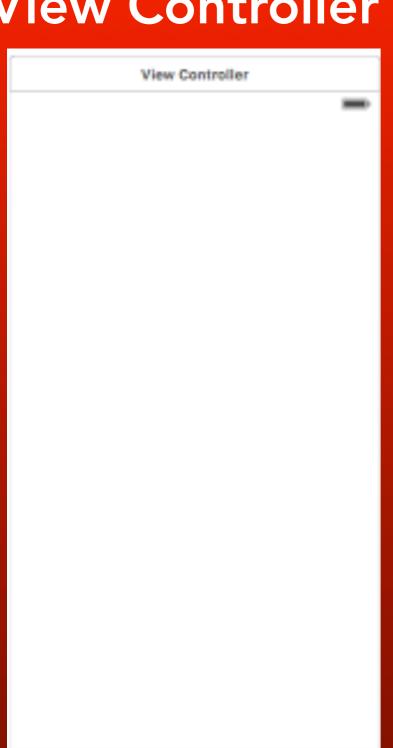

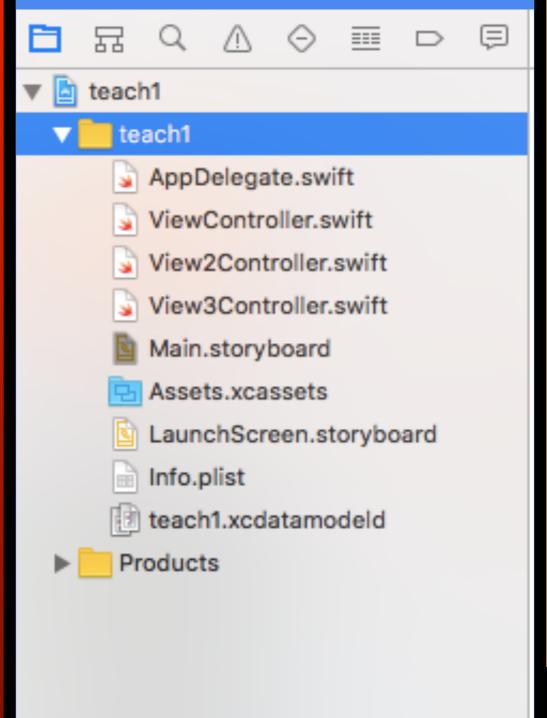

範例: github

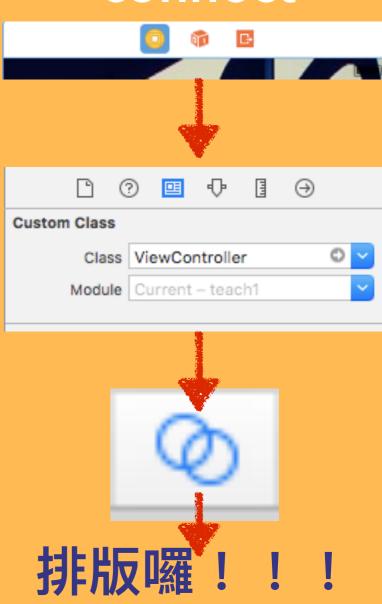

REVIEW ... PROCESS

View Controller View Controller.swift 程式與介面連結

connect

REVIEW ...

View Controller

View Controller.swift

到底有蝦米?

——>宣告 connect

START

複習上次目標123

目標1:完成版面配置&宣告目標2:換頁&SEGUE傳遞值

目標3:圖片遮罩

by 雅方

目標1:

完成版面配置&宣告

命名資料(取有意義的名字很重要!!!)

ex: aa ——> 你問我他是誰!!??… 我不知道XD

ex: name —-> 你問我他是誰!!???
用膝蓋想也知道放名字齁XD

let (不可變動-常數) var (可變動-變數)

```
let name:String = "Swift girls"

—--> "Swift girls"
```

var name:String = "Swift girls"

let (不可變動-常數) var (可變動-變數)

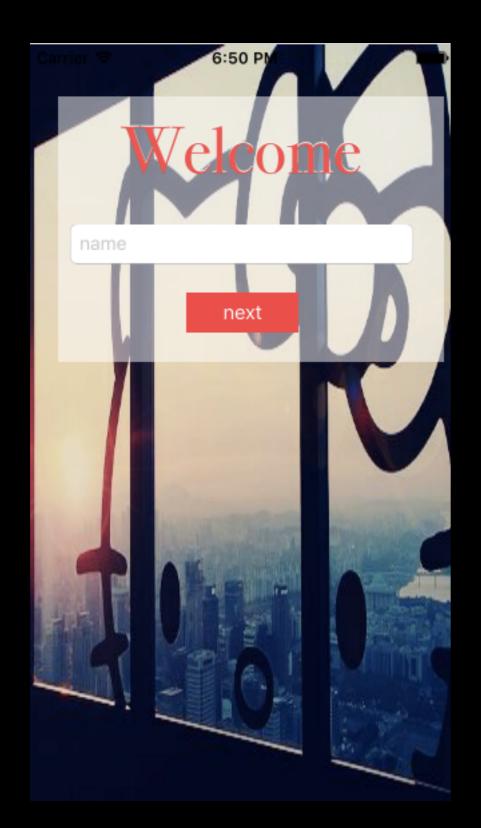

屬性可省略~

let name = "Swift girls" —-> "Swift girls"

var name = "Swift girls"

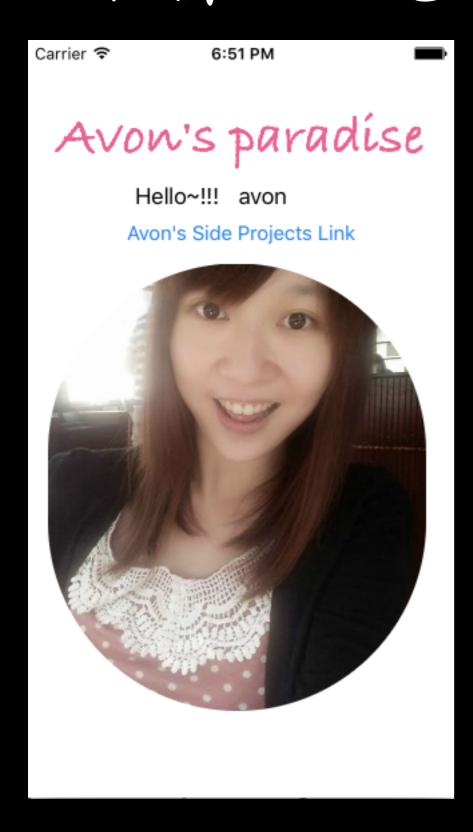

name = "Avon" --->"Avon"

var email = "" ——>就知道你是String了!

first page

```
    //放文字的欄框
    @IBOutlet weak var nameInput: UITextField!
    //按鈕
    @IBOutlet weak var nextButton: UIButton!
```

second page

//文字顯示欄
 @IBOutlet weak var name_get: UILabel!
 //圖片視圖
 @IBOutlet weak var head: UIImageView!

目標2:

換頁&SEGUE傳遞值

目標2:換頁&SEGUE傳遞值

PAGE1:放文字的籃框

(蘋果?香蕉?...)

PAGE2:文字顯示欄 (箱子)

目標2:換頁&SEGUE傳遞值

PAGE1:放文字的籃框 (蘋果?香蕉?...)

```
//segue 的 function
override func prepareForSegue(segue: UIStoryboardSegue, sender: AnyObject?) {
    //定義要換頁到哪裡?
    //segue的目標 (destinationViewController) 是 (as!) 第二頁 (View2Controller)
    let seconed = segue.destinationViewController as! View2Controller

//第二頁的文字 = 第一頁 放文字籃框裡的文字
    seconed.name = self.nameInput.text!
```

目標2:換頁&SEGUE傳遞值

```
//定義 第二頁接收的是文字
var name = ""
```

```
override func viewDidLoad() {
    super.viewDidLoad()

    //文字顯示欄裡的文字 = 第二頁接收的文字
    name_get.text = name;
```

PAGE2:文字顯示欄 (箱子)

目標3:

圖片遮罩

目標3:圖片遮罩

```
//圖片的遮罩之圓角弧度半徑 是 圖片本身寬度的1/2
self.head.layer.cornerRadius = self.head.frame.size.width/2
//圖片的遮罩是否要放上去?
self.head.layer.masksToBounds = true
```

NEW GOAL (NEXT TIME)

目標4:

WEBVIEW

目標4:WEB VIEW

```
//宣告 web view
@IBOutlet weak var webView: UIWebView!
override func viewDidLoad() {
    super.viewDidLoad()
   //網址為...
    let address = "https://www.google.com/"
   //網址轉成url型態
    let url = NSURL(string: address)
   //請求使用url
    let request = NSURLRequest(URL: url!)
   //webview的載入請求
    self.webView.loadRequest(request)
```

免費開發者

實機測試

READY GO!!!

必須xcode & iPhone 都是更新狀態 (相符合版本)

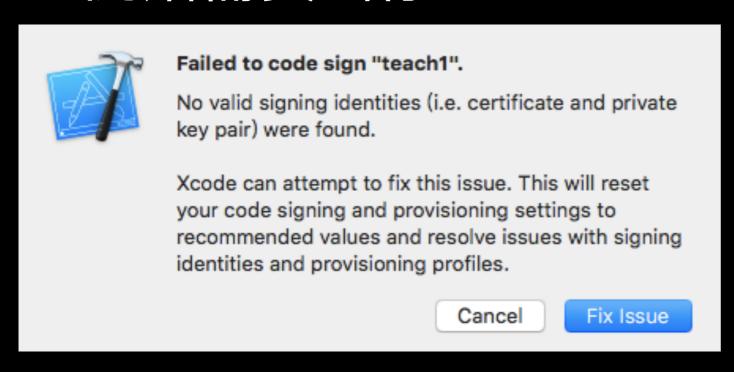

The run destination iPhone is not valid for Running the scheme 'teach1'.

iPhone's iOS 9.0.1 doesn't match teach1.app's iOS 9.3 deployment target. Upgrade iPhone's iOS version or lower teach1.app's deployment target.

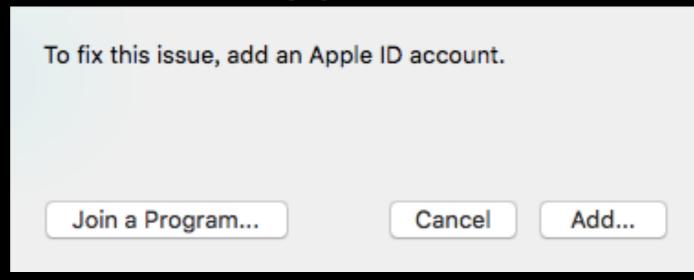

OK

相合才相契~~~>////<

一開始需要叫你 fix issue

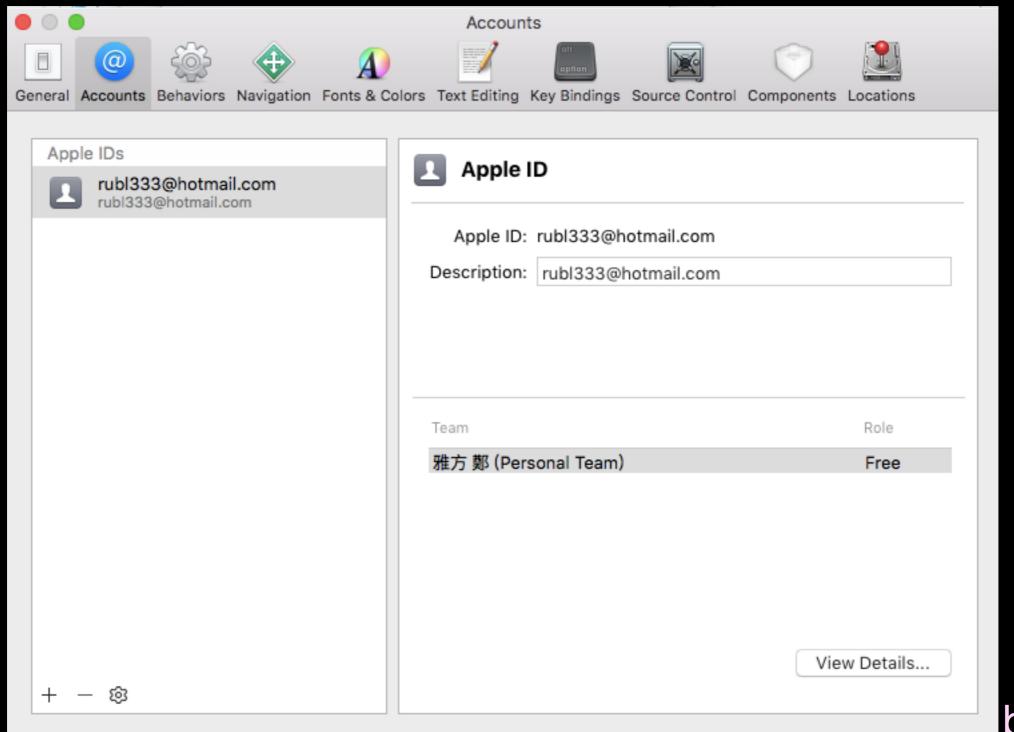

接著 add Apple ID account

輸入自己的喔!!! 或者用xcode —> preferences 打開

Accounts				
	♠ A	Million and the second		
General Accounts Behaviors	Navigation Fonts & Colors	Text Editing Key Bindings	Source Control Co	omponents Locations
Sign in to use your Apple ID. If you have an Apple ID, sign in with it here. If you have used the iTunes Store or iCloud, for example, you have an Apple ID. If you don't have an Apple ID, click Create Apple ID.				
	Apple ID	Passwo	ord	Forgot?
example@icloud.co		require	ed	
	Create Apple ID		Cancel	Sign In
No Acco	unts	Click add (+) but	tton to create	a new account
+ - 🕸				

進入之後可以看到自己的開發者資料 按右下方的"view Detail"

- · create "IOS Development" 產生開發憑證
- 手機部分

設定"信任"自己的開發者帳號所產生的app 就成功囉!:)

一般 一> 裝置管理一> 找自己的Apple ID 一> 信任
